

TABLE 7B. Horsepower of Power Equipment Used, by Type of Operation: 1963 and 1954 continued

		1963						
		Prime movers (horsepower)						
Ind. code	Industry and type of operation	Total (1,000)	Loading equipment (1,000)	By type of equipment		By use		Not driving generators (1,000)
				Other	Transportation equipment High wave type (1,000)	All other equipment (1,000)	Driving generators (1,000)	
Driven by purchased energy	Anthracite mining industries, total			10	4			7
			15	2			5
1111	ANTHRACITE INDUSTRY	362		15	2			5
257								
	Type of operation							
	Producing establishments, total	257		14				1
	Mining operations only:							1
	Strip-pit	65						2
	Underground	31						4
	Culm bank	6						24
	Combination	16						1963
	Mining operations with preparation plants:							
	Strip-pit	4						Electric motors
	Underground	10						(horsepower)
	Dredge	3						
	Combination	82						
	Preparation plants only:							
	Mechanical cleaning	30						By type of
	Mechanical crushing, screening, and sizing only	1						equipment
	Nonproducing establishments							nt
1112	ANTHRACITE MINING SERVICES							Transportation
105								equipment (1,000)
	Total							
	1,000						
	91						
	Anthracite mining industries, total							
	384						
1111	ANTHRACITE INDUSTRY							
365								
	Type of operation							
	Producing establishments, total	359						
	Mining operations only:							
	Strip-pit	27						
	Underground	69						
	Culm bank	2						
	Combination	14						
	Mining operations with preparation plants:							
	Strip-pit	37						
	Underground

84				3			
				10	Driven by enerav	2	
					generated at same	3	

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

Less than 500 horsepower.

Represents combined underground mines and strip-pits only.

Represents breakers only.

No production, development, or exploration workers were reported at nonproducing establishments in 1963.
